

AI STUDYBUDDY API

Demonstration of Proposed Features

Suggested walkthrough

TEAM ID	SWTID-2026-2776
TEAM SIZE	5
TEAM	Saisaran R (Leader); Dharanish R; Murugan G; Thirunavukkarasu D; Dhamothiran C
DATE	30 September 2026

Preparation

Configure a test database and Gemini key; start with node index.js as README specifies; use synthetic study notes and non-sensitive accounts.

Sequence

- Check root health response.
- Register/login and obtain tokens.
- Upload a small .txt or .md file.
- List and retrieve material.
- Generate summary, flashcards, quiz, and study plan.
- Show admin statistics with an admin account.
- Explain ownership and security limitations.

Important checks

Do not demonstrate a PDF as successfully parsed until PDF text extraction is verified. Verify token header method against implementation. Do not use self-selected admin registration in a real deployment.

Evidence

No screenshots, Postman collection, or live response record was present in the uploaded ZIP.
