Empathy Map

Perspective of student and administrator

TEAM ID	SWTID-2026-2776
TEAM SIZE	5
TEAM	Saisaran R (Leader); Dharanish R; Murugan G; Thirunavukkarasu D; Dhamothiran C
DATE	30 September 2026

Student

Wants a personal library, quick summaries, revision questions, and a schedule that uses available time.

Administrator

Needs to review users and aggregate student/material counts, and remove accounts with associated materials.

Says and thinks

"Can I upload my notes?" "Can I revise with flashcards?" "Will another student access my material?"

Journey

- Student registers or logs in and receives access/refresh tokens.
- Student uploads a supported file, then opens their material list.
- Student requests a summary, flashcards, quiz, or study plan.
- Administrator uses role-restricted endpoints.

Research boundary

This empathy map reflects stated product behavior, not interviews or observed student research.
